Thank you for visiting my site. I hope you have the chance to look around and please visit again as I will be adding more materials for all levels. I have made my materials with the choice of different fonts. I use " Fonts 4 Teachers" which is a wonderful product that has educational fonts. You can purchase materials with these print choices.

Print

*Modern Manuscript*

*Cursive*

I have also designed my materials to fit into containers easily found in office supply stores or from the container store. I will provide a recommendation with the materials of what container works well.

This free sample shows the quality of art work that was created by a professional artist, Carolyn McFann. Carolyn was a Montessori Student and her mother a Montessori teacher. These cards will fit into a business card holder. To prepare the cards cut with a paper cutter using the guides to achieve straight lines and a paper punch to punch out the black circles. This work should include a golf tee or peg which the child will poke through the hole of the appropriate sound. It is helpful to use a colored marker to mark the back of the card as a control of error. It is best to use cardstock for printing.
